

“Love is the source of life”

Dear Reader,

Facts of some important actions carried out by a team of [INTER]national Postmasters from 2020 to date:

-1: October 2023 visit to the Vatican and presented a document to the Pope, with which the sovereignty of the world population had to be quickly secured, this all had to do with the Balfour Declaration that expired on October 30, 2023, this is the first step taken, that the WHO did not become the boss of the world's citizens in order to enslave them completely, because a citizen (straw man = fictional creation on paper and has a digital registration) so simply explained, he cannot write, talk and read and a living human being, breathing and consisting of living flesh and flowing blood, who is protected by the twelve (12) universal human rights...; and

-2: October 2024, the alarm bells are ringing again due to worrying reports from America that they have now found something to push through what was previously unsuccessful, this can also be seen worldwide in the resistance against local, regional and national governments. On September 22, the United Nations quietly signed a treaty to initiate a global transformation to place the world under one government and designate all living people as global citizens and then place them with an AI computer that prints your fingerprint, facial recognition and eyes biometrically recognized and then falls under a social credit system. An AI that then determines whether you can still go shopping, cross the border on holiday or whether you will be placed in a re-education camp against your will. All your rights are thus taken away. As postmaster, we have taken action on this because the silent treaty has full legal force for the 'Elite UN/UN' after thirty (30) days and that has been stopped and corrected retroactively, but we are not quite there yet. We will give you all a shortened English version for yourself, with which you can say to the government after signing, this is not what we want, your UN - EU - WHO - Bilderberg - WEF and so on rules are not my rules, which you submit to me as living woman or man has not asked permission...; and

The shortened document (English) has been specially created for you as a living person to object to the local, state and national government that you do not agree to place yourself as a world citizen under a social credit system; and

To legalize the document yourself as a living person, go to the last page:

- In the middle below the word **General Executor**, write your name in full small letters with a **red pen** (first name, baptismal name and last name) and diagonally to the right as an example: **barbara john, smith** (write diagonally and together) and do you have a red stamp box then you make an imprint on your first name with your thumb, with which you seal your **DNA blood seal** with **red ink** on your legalization as **General Executor**; and
- Write your **signature** on the left with a **Green Pen**. That is your **natural-law** right sealing as a living human being; and
-
- Write above in red ink **:COPY:** above your letter; and
- Send the copy by post, email or personally deliver to your local, provincial, national government and their employees, National politics or General Affairs, Health care, Police, General Practitioner, Municipality, Province, etc. (ordinarily you keep it at home).

'Kind regards, Team Postmasters'
